

## ANNEXE 2

### WEBOGRAPHIE

*“To build a sustainable society, we must first be willing to rethink our fundamental concepts of science, economics, and society. We must build a new sustainable society on the philosophical foundation of a new worldview, a new approach to science, a new economics of sustainability”*  
~ John Ikerd

#### Système alimentaire et écologie

The future of food: a necessary road map from uniformity to diversity

## **La permaculture**

*"What permaculturists are doing is (some of) the most important activity that any group is doing on the planet. We don't know what the details of a truly sustainable future are going to be like, but we need options. We need people experimenting in all kinds of ways and permaculturists are one of the critical groups that are doing that".*

*~Dr. David Suzuki, Geneticist, Renowned Environmentalist and Broadcaster*
